2.3.59.2  
(01-20-2003)  
**Command Code BMFOL  
Overview**

- (1) The Business Master file on-line system provides read-only access to accounts on the Business Master File in Martinsburg, WV. All entities, master file tax modules and the most recent seven years of retention data are in on-line status.

2.3.59.3  
(01-01-2000)  
**Command Code BMFOL  
Basics**

- (1) This command code is provided to furnish access to the Business Master File. Fields available include basic identifying information, amounts, dates, codes, indicators, and freezes. Transaction postings, status history, audit history, vestigial data, federal tax deposit, exempt organization, and combined annual wage reporting data are also available. Additionally, for any specified account, a tax module summary and last period satisfied information can be requested.
- (2) A help feature provides on-line user assistance.
- (3) Whenever possible the entire set of data requested will be presented on a single page. When all the data cannot fit on a single page, multiple pages will be required for the presentation of the entire set of data.

2.3.59.4  
(01-16-2020)  
**Command Code BMFOR  
Basics**

- (1) This command code is provided to furnish access to the BMF retention tax modules from accounts that merged to a new TIN after the tax module had been dropped to retention. When an account merge takes place, retention modules removed prior to the merge continue to be stored on the retention registers under the old TIN. This command code allows access to those records.
- (2) The input format of BMFOR is the same as that of BMFOL. Abbreviated requests are not allowed for BMFOR input. BMFOR executes the same programs as BMFOL and provides the same screen responses as BMFOL.
- (3) BMFOR displays the tax module screens only. Valid definer codes are 'A' for Adjustment, 'R' for Posted Return, 'S' for Status History and 'T' for Tax Module.
- (4) Entity information, such as Name Control, Cycle, PDT Indicator, CID Indicator and Filing Requirements are not displayed for these modules.
- (5) These tax modules cannot be re-established to Master File through BMFOL definer code 'B'.
- (6) Only BMF modules dropped to retention in 2017 and later are available.

2.3.59.5

(01-16-2020)

**Restoring RRR Tax  
Modules to Master File**

- (1) Recoverable Retention Register (RRR) tax modules are also available through BMFOL. When a BMFOL request is received from a user for an RRR module it is retrieved from the BMF Retention tables and displayed. A confirmation screen will be returned with message 'CFOL038 - TAX MODULE REQUESTED TO BE REESTABLISHED'.
- (2) BMFOL definer code B is used to restore RRR tax modules back to the active BMF Master File. RRR tax modules are those dropped from 2017 to present and are listed on the BMFOL Summary Screen, definer code I.
- (3) One transaction is created by run 160-26 (ECC-MTB), a TC008 with the tax module. BMFOL sends these transactions weekly to BMF and they will attempt to post that cycle.
  - a. Weekly cut-off time for BMFOLB requests is 5:00 pm Wednesday ET. Requests input after 5:00 pm Wednesday are processed the following cycle.

2.3.59.7  
(01-17-2010)  
**Command Code BMFOL**  
**Abbreviated Input**  
**Formats**

- (1) Abbreviated formats permit the user to omit input fields that are the same as the previous command. For instance the user may want to view a different tax period for the same TIN and MFT or may want to view status information immediately after having viewed the return for the same module.
- CC BMFOL input with a “tax type” definer, an MFT, a tax period and plan number will result in the display of data for the same TIN and display file source.
  - CC BMFOL input with an “entity type” definer and a TIN will result in the display of other data for the same display file source.
  - CC BMFOL input with an “entity type” definer will result in the display of data for the same TIN and display file source.
